pass pass (disabled) X block block (disabled) reject reject (disabled) log log (disabled) in out first match last match

Active/Inactive Schedule (click to view/edit)

Alias (click to view/edit)

LOKWindows rules are evaluated on a first-match basis by default (i.e. the action of the first rule to match a packet will be executed). This means that if you use block rules, you will have to pay attention to the rule order. Everything that is not explicitly passed is blocked by default.
